## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- a. The phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

- b. The phrase "etc." renders the claim indefinite because the claim includes elements not actually disclosed (those encompassed by "etc."), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

- c. The use of the term "fine" renders the claim ambiguous. The term is neither defined in the specification nor does it have a well-defined meaning in the art. The degree of fineness has never been defined.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1774

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Moriguchi et al. (US 5,572,291).

Moriguchi discloses a film for imaging (abstract). The film is coated with a layer comprising an anti-static agent, which provides a surface resistivity of  $5 \times 10^7$ - $5 \times 10^{10} \Omega$  in an environment of temperature of 20 degree C and a humidity of 60% RH (col. 13, lines 6-18).
